

Richard Starr.

What to say about him? Well, he was a man that always stood up for those that needed it. I, Ella Bright-Starr, met him for the first time when he first was voted into Office; until then, I had not even noticed him. After that meeting, I had a crush. I felt like a schoolgirl, but I had to turn that feeling off as there was work to do, unknowing to me that he from that day changed my life.

William Starr and Rebecca Starr gave birth to Richard Starr on 13 of August 1981. They lived in LA. Richard moved to Rural California because he despised the city life. At the age of 19, he was kidnapped, stabbed, and left for dead by Michael Norman. After he recovered, he joined the California Highway Patrol, where he was employed for 10 years. During those 10 years, he received his Masters in Psychology with concentration in Forensic Psychology.

After he received his degree, he was employed by the FIB in 2009. Because of his past, he requested an assignment to investigate and catch Serial Killers. Eventually, he was promoted to Supervisory Special Agent and retired in 2022 after his parents were murdered by gang violence in the city. He moved to San Andreas for a new start. After learning that PD was not hiring, he applied and was accepted into Mount Zonah: Hospital Security on January 19th of 2022. He worked closely with Ciri Grey(Solomons/Jax), Bas Stone, and Jaydon Turgeon. SASS was formed in April of 2022, where he was nominated as Director.

Richard was the only governor that has sat 2 terms back to back. He Vetoed the most bills out of any governor before him. He fixed our broken system. When something was submitted, he would listen to those around him that would be affected by that House bill, and if there was an issue, he would deal with that. Richard was the best governor we have ever had and ever will have.

Richard and I went on holiday after he was poisoned while in office, and we had a Son together. He went and lived in LA with his uncle. I am sad he will never know his father, but one day, he will see this article and understand he was a great man that did what he could to help those in need.

After this, he was going to go to State representative and started on the path, But SASS needed him. So He stepped up to where he was needed. He came back to SASS and fixed the SOP's and started on the path to repair and bring SASS back to the old days.
