

PRESS RELEASE

FOR IMMEDIATE RELEASE:

Saturday, April 5th, 2025

Mission Row, SA - We are thrilled to announce that we have implemented brand new equipment into our patrol vehicles. Equipment that is state of the art technology. We are officially entering the paper age of the 21st century.

Effective immediately, law enforcement officers from all agencies will begin issuing physical copies of traffic citations right on the side of the road. These printed citations will include information regarding the stop, including: the location of the traffic stop, the make & model of the vehicle, a list of the traffic violations committed, the fine amount owed, and the law enforcement officer who wrote the citation.

For over four years, we've made do with verbal warnings or digital entries that drivers never actually saw. But not anymore. We believe that this is a step towards better documentation and clearer communication with the public.

If you find yourself getting pulled over, enjoy your freshly printed souvenir.

Respect, Integrity, Professionalism, and Excellence
